American Journal of Physiology: Endocrinology and Metabolism

No. 1. JULY 1995

Receptor-mediated clearance of G-CSF derivative nartograstim in bone marrow of rats
T. Kuwabara, T. Uchimura, H. Kobayashi, S. Kobayashi, and Y. Sugiyama E1

Cortisol feedback in adrenalectomized adult sheep
A. McFarlane, J. Coghlan, J. Tresham, and E. M. Wintour E10

A limitation in the use of mass isotopomer distributions to measure gluconeogenesis in fasting humans
B. R. Landau, C. A. Fernandez, S. F. Previs, K. Ekberg, V. Chandramouli, J. Wahren, S. C. Kalhan, and H. Brunengraber E18

Increased concentrations of glycogen synthase protein in skeletal muscle of patients with NIDDM
M. Löfman, H. Yki-Järvinen, M. Parkkonen, J. Lindström, L. Koranyi, C. Schalin-Jäntti, and L. Groop E27

Alterations in hepatic production and peripheral clearance of IGF-I after endotoxin
J. Fan, D. Char, A. J. Kolasa, W. Pan, S. R. Maitra, C. S. Patlak, Z. Spolarics, M. C. Gelato, and C. H. Lang E33

Cation channel activated by muscarinic agonists on porcine adrenal chromaffin cells
E. J. Forsberg, Q. Li, and Y. Xu E43

Responses of immunoreactive ACTH and bioactive ACTH to large hemorrhage and resuscitation in conscious dogs
M. P. Lilly, G. J. Gala, B. E. Sutherland, and D. S. Gann E53

Arginine enhances glycogen synthesis in response to insulin in 3T3-L1 adipocytes
J. M. Egan, T. E. Henderson, and M. Bernier E61

Model of extreme hypoglycemia in dogs made ketotic with (*R*,*S*)-1,3-butanediol acetoacetate esters
S. T. Ciraolo, S. F. Previs, C. A. Fernandez, K. C. Agarwal, F. David, J. Koshy, D. Lucas, A. Tammaro, M. P. Stevens, K.-Y. Tserng, M. L. Halperin, and H. Brunengraber E67

Role of prolactin and gonadal steroids in regulation of oxytocin mRNA during lactation
R. Ghosh and C. D. Sladek E76

Melatonin inhibition of GnRH-induced LH release from neonatal rat gonadotroph: involvement of Ca^{2+} not cAMP
J. Vanecek and D. C. Klein E85

Marked resistance of RARγ-deficient mice to the toxic effects of retinoic acid
J. Look, J. Landwehr, F. Bauer, A. S. Hoffmann, H. Bluethmann, and P. LeMotte E91

Regulation of cholesteryl ester transfer activity in adipose tissue: comparison between hamster and rat species
G. X. Shen and A. Angel E99

Pituitary adenylate cyclase-activating polypeptide: occurrence and relaxant effect in female genital tract
B. R. Steenstrup, P. Alm, J. Hannibal, J. C. Jørgensen, C. Palle, J. Junge, H. B. Christensen, B. Ottesen, and J. Fahrenkrug E108

Central adiposity and its metabolic correlates in obese adolescent girls
S. Caprio, L. D. Hyman, C. Limb, S. McCarthy, R. Lange, R. S. Sherwin, G. Shulman, and W. V. Tamborlane E118

A model of skeletal muscle leucine kinetics measured across the human forearm
P. Tessari, S. Inchiostro, M. Zanetti, and R. Barazzoni E127

Effect of somatotropin and feed restriction on body composition and adipose metabolism in obese Zucker rats
M. J. Azain, D. B. Hausman, T. R. Kasser, and R. J. Martin E137

Placental norepinephrine clearance: in vivo measurement and physiological role
L. Bzoskie, L. Blount, K. Kashiwai, Y.-T. Tseng, W. W. Hay, Jr., and J. F. Padbury E145

The insulin action-fiber type relationship in humans is muscle group specific
M. S. Hickey, M. D. Weidner, K. E. Gavigan, D. Zheng, G. L. Tyndall, and J. A. Houmard E150

Kinetics of glucose delivery to subcutaneous tissue in rats measured with 0.3-mm amperometric microsensors
C. P. Quinn, M. V. Pishko, D. W. Schmidtke, M. Ishikawa, J. G. Wagner, P. Raskin, J. A. Hubbell, and A. Heller E155

Regulation of α_2-adrenergic receptor expression and signaling in pancreatic β-cells
D. Hamamdzic, E. Duzic, J. D. Sherlock, and S. M. Lanier E162

Estimating energy expenditure from specific activity of urine urea during lengthy subcutaneous $NaH^{14}CO_3$ infusion
M. Elia, M. G. Jones, G. Jennings, S. D. Poppitt, N. J. Fuller, P. R. Murgatroyd, and S. A. Jebb E172

MODELING IN PHYSIOLOGY

Bicarbonate kinetics in humans: identification and validation of a three-compartment model
M. P. Saccomani, R. C. Bonadonna, E. Caveggion, R. A. DeFronzo, and C. Cobelli E183

RAPID COMMUNICATION

A compartmental model of 3-methylhistidine metabolism in humans
J. A. Rathmacher, P. J. Flakoll, and S. L. Nissen E193

No. 2. AUGUST 1995

Impact of infection on hepatic disposal of a peripheral glucose infusion in the conscious dog
O. P. McGuinness, J. Jacobs, C. Moran, and B. Lacy E199

VLDL output by hepatocytes from obese Zucker rats is resistant to the inhibitory effect of insulin
C. S. Bourgeois, D. Wiggins, R. Hems, and G. F. Gibbons E208

Atrial natriuretic peptide induces acrosomal exocytosis in bovine spermatozoa
N. Zamir, D. Barkan, N. Keynan, Z. Naor, and H. Breitbart E216

Decreased glucose turnover after short-term training is unaccompanied by changes in muscle oxidative potential
S. M. Phillips, H. J. Green, M. A. Tarnopolsky, and S. M. Grant E222

Effects of glucagon with or without insulin administration on liver glycogen metabolism
N. Ercan, M. C. Gannon, and F. Q. Nuttall E231

Vitamin E prevents diabetes-induced abnormal retinal blood flow via the diacylglycerol-protein kinase C pathway
M. Kunisaki, S.-E. Bursell, A. C. Clermont, H. Ishii, L. M. Ballas, M. R. Jirousek, F. Umeda, H. Nawata, and G. L. King E239

In vivo study of the biosynthesis of long-chain fatty acids using deuterated water
H. O. Ajie, M. J. Connor, W. N. P. Lee, S. Bassilian, E. A. Bergner, and L. O. Byerley E247

Natriuretic peptide receptors in the fetal rat
J. Brown and Z. Zuo E253

Oxidation of glutamic acid by the splanchnic bed in humans
A. Battezzati, D. J. Brillon, and D. E. Matthews E269

Biological activity of immunoreactive insulin-like activity extracted from rat submandibular gland
M. Taouis, D. D. De Periere, D. Hillaire-Buys, M. Derouet, R. Gross, J. Simon, and G. Ribes E277

A malonyl-CoA fuel-sensing mechanism in muscle: effects of insulin, glucose, and denervation
A. K. Saha, T. G. Kurowski, and N. B. Ruderman E283

Gonadotropin-stimulated regulation of blood-follicle barrier is mediated by nitric oxide
R. W. Powers, L. Chen, P. T. Russell, and W. J. Larsen E290

Uteroplacental carbon substrate metabolism and O_2 consumption after long-term hypoglycemia in pregnant sheep
T. D. Carver and W. W. Hay, Jr. E299

Stimulatory effect of glutamine on glycogen accumulation in human skeletal muscle
M. Varnier, G. P. Leese, J. Thompson, and M. J. Rennie E309

Gastric inhibitory polypeptide release from a tumor-derived cell line
T. J. Kieffer, Z. Huang, C. H. S. McIntosh, A. M. J. Buchan, J. C. Brown, and R. A. Pederson E316

Insulin and counterregulatory hormones influence acute-phase protein production in human hepatocytes
M. G. O'Riordain, J. A. Ross, K. C. H. Fearon, J. Maingay, M. Farouk, O. J. Garden, and D. C. Carter E323

Sterol metabolism in fetal, newborn, and suckled lambs and their response to cholesterol after weaning
C. P. Cavender, S. D. Turley, and J. M. Dietschy E331

Regional differences in adipose tissue lipolysis from lean and obese women: existence of postreceptor alterations
P. Mauriège, D. Prud'homme, S. Lemieux, A. Tremblay, and J. P. Després E341

Polyunsaturated fatty acids recruit brown adipose tissue: increased UCP content and NST capacity
A. Sadurskis, A. Dicker, B. Cannon, and J. Nedergaard E351

Effect of intravenous glucose and lipid on proteolysis and glucose production in normal newborns
S. C. Denne, C. A. Karn, J. Wang, and E. A. Liechty E361

Simultaneous treatment with IGF-I and GH additively increases anabolism in parenterally fed rats
H.-C. Lo, P. S. Hinton, C. A. Peterson, and D. M. Ney E368

MODELING IN PHYSIOLOGY EDITORIAL

Mathematical modeling as a tool for advanced research in endocrinology and metabolism
C. Desjardins and M. A. F. Epstein E377

MODELING IN PHYSIOLOGY INVITED REVIEW

Receptor discrimination and control of agonist-antagonist binding
R. J. Tallarida E379

No. 3. SEPTEMBER 1995

INVITED REVIEW

Proenkephalin gene regulation in the neuroendocrine hypothalamus: a model of gene regulation in the CNS
D. Borsook and S. E. Hyman E393

Interaction of decreased arterial P_{O_2} and exercise on carbohydrate metabolism in the dog
B. A. Zinker, R. D. Wilson, and D. H. Wasserman E409

Pentagastrin increases pepsin secretion without increasing its fractional synthetic rate
M. E. Corbett, E. J. S. Boyd, J. G. Penston, K. G. Wormsley, P. W. Watt, and M. J. Rennie E418

Trophic effects of angiotensin II on neonatal rat cardiac myocytes are mediated by cardiac fibroblasts
N. N. Kim, F. J. Villarreal, M. P. Printz, A. A. Lee, and W. H. Dillmann E426

Mechanotransduction in bone: role of strain rate
C. H. Turner, I. Owan, and Y. Takano E438

Estimation of glucose-alanine-lactate-glutamine cycles in postabsorptive humans: role of skeletal muscle
G. Perriello, R. Jorde, N. Nurjhan, M. Stumvoll, G. Dailey, T. Jenssen, D. M. Bier, and J. E. Gerich E443

Tumor-related selection of calcium signals in vasopressin-stimulated human adenomatous corticotrophs
J.-B. Corcuff, N. C. Guerineau, A. Tabarin, and P. Mollard E451

Skeletal muscle pyruvate dehydrogenase activity during maximal exercise in humans
C. T. Putman, N. L. Jones, L. C. Lands, T. M. Bragg, M. G. Hollidge-Horvat, and G. J. F. Heigenhauser E458

Role of glucagon in maintenance of euglycemia in fed and fasted rats
C. L. Brand, P. N. Jørgensen, U. Knigge, J. Warberg, I. Svendsen, J. S. Kristensen, and J. J. Holst E469

Pulsatile insulin secretion accounts for 70% of total insulin secretion during fasting
N. Pørksen, S. Munn, J. Steers, S. Vore, J. Veldhuis, and P. Butler E478

Diurnal rhythmicity of human cholesterol synthesis: normal pattern and adaptation to simulated "jet lag"
L. K. Cella, E. Van Cauter, and D. A. Schoeller E489

Response of leucine metabolism to hyperinsulinemia under amino acid replacement in experimental hyperthyroidism
I. Tauveron, S. Charrier, C. Champredon, Y. Bonnet, C. Berry, G. Bayle, J. Prugnaud, C. Obled, J. Grizard, and P. Thiéblot E499

Quantification of incorporation of [^{15}N]ammonia into plasma amino acids and urea
B. W. Patterson, F. Carraro, S. Klein, and R. R. Wolfe E508

Measuring gluconeogenesis with [2-^{13}C]glycerol and mass isotopomer distribution analysis of glucose
O. Peroni, V. Large, and M. Beylot E516

Thromboxane A_2-stimulated phospholipase D in osteoblast-like cells: possible involvement of PKC
J. Shinoda, A. Suzuki, Y. Oiso, and O. Kozawa E524

Nerve function and regeneration in diabetic rats: effects of ZD-7155, an AT_1 receptor antagonist
E. K. Maxfield, A. Love, M. A. Cotter, and N. E. Cameron E530

Distinguishable substrate pools for muscle glyconeogenesis in lactate-supplemented recovery from exercise
C. Ryan and J. Radziuk E538

Glutamate stimulates insulin secretion and improves glucose tolerance in rats
G. Bertrand, R. Puech, M. M. Loubatieres-Mariani, and J. Bockaert E551

Glucose turnover in presence of changing glucose concentrations: error analysis for glucose disappearance
A. Caumo, M. Homan, H. Katz, C. Cobelli, and R. Rizza E557

Glucagon increases urinary oxalate excretion in the guinea pig
R. P. Holmes, C. H. Hurst, D. G. Assimos, and H. O. Goodman E568

Synergistic interaction of glucose and neurohumoral agonists to stimulate islet phosphoinositide hydrolysis
G. G. Kelley, K. C. Zawalich, and W. S. Zawalich E575

Splanchnic and muscle metabolism during exercise in NIDDM patients
I. K. Martin, A. Katz, and J. Wahren E583

Relationship between changes in body composition and insulin responsiveness in models of the aging rat
N. Barzilai and L. Rossetti E591

Inhibition of ACTH secretion blocks hypoxia-induced increase of adrenal cortical blood flow in fetal sheep
A. M. Carter, J. Homan, M. Fraser, B. S. Richardson, and J. R. G. Challis E598

Thyroid hormone increases the partitioning of glucose transporters to the plasma membrane in ARL 15 cells
R. S. Haber, C. M. Wilson, S. P. Weinstein, A. Pritsker, and S. W. Cushman E605

No. 4. OCTOBER 1995

EDITORIAL

Times of change
L. R. Johnson E611

INVITED REVIEW

Gene-targeting and transgenic approaches to IGF and IGF binding protein function
T. L. Wood E613

Evidence that increased glucose cycling in islets of diabetic *ob*/*ob* mice is a primary feature of the disease
A. Khan and S. Efendic E623

Tissue IGF-I protein and mRNA responses to a single injection of somatotropin
T. G. Ramsay, I. B. Chung, S. M. Czerwinski, J. P. McMurtry, R. W. Rosebrough, and N. C. Steele E627

Protein and glucose metabolism during isolated closed-head injury
P. J. Flakoll, L. S. Wentzel, and S. A. Hyman E636

Dexamethasone enhances accumulation of cholesteryl esters by human macrophages
W. Cheng, K. V. Kvilekval, and N. A. Abumrad E642

A new correction factor for use in tracer estimations of plasma fatty acid oxidation
L. S. Sidossis, A. R. Coggan, A. Gastaldelli, and R. R. Wolfe E649

Determinants of cardiac fibrosis in experimental hypermineralocorticoid states
M. Young, G. Head, and J. Funder E657

Response of glutamine metabolism to exogenous glutamine in humans
R. G. Hankard, D. Darmaun, B. K. Sager, D. D'Amore, W. R. Parsons, and M. Haymond E663

Effects of caffeine on energy metabolism, heart rate, and methylxanthine metabolism in lean and obese women
D. Bracco, J.-M. Ferrarra, M. J. Arnaud, E. Jéquier, and Y. Schutz E671

Lactate transport studied in sarcolemmal giant vesicles from rat skeletal muscles: effect of denervation
H. Pilegaard and C. Juel E679

In vivo evidence of a positive role for somatostatin to optimize pulsatile growth hormone secretion
J. P. Turner and G. S. Tannenbaum E683

Blunting of the immediate-early gene and mitogenic response in hepatectomized type 1 diabetic animals
S. Chin, S. Ramirez, L. E. Greenbaum, A. Naji, and R. Taub E691

Regulation of hexokinase II and glycogen synthase mRNA, protein, and activity in human muscle
L. J. Mandarino, R. L. Printz, K. A. Cusi, P. Kinchington, R. M. O'Doherty, H. Osawa, C. Sewell, A. Consoli, D. K. Granner, and R. A. DeFronzo E701

Insulin resistance after hypertension induced by the nitric oxide synthesis inhibitor L-NMMA in rats
A. D. Baron, J.-S. Zhu, S. Marshall, O. Irsula, G. Brechtel, and C. Keech E709

Identification of target cells for growth hormone's action in the arcuate nucleus
K. A. Burton, E. B. Kabigting, R. A. Steiner, and D. K. Clifton E716

Insulin regulates circulating insulin-like growth factors and some of their binding proteins in lactating cows
M. A. McGuire, D. A. Dwyer, R. J. Harrell, and D. E. Bauman E723

Persistence of metabolic consequences in the progeny of rats fed a HC formula in their early postnatal life
S. Vadlamudi, S. C. Kalhan, and M. S. Patel E731

Neonatal rat dietary carbohydrate affects pancreatic islet insulin secretion in adults and progeny
S. G. Laychock, S. Vadlamudi, and M. S. Patel E739

Magnesium supplementation reduces development of diabetes in a rat model of spontaneous NIDDM
T. W. Balon, J.-L. Gu, Y. Tokuyama, A. P. Jasman, and J. L. Nadler E745

Effects of a continuous lipid infusion on glucose metabolism in critically ill patients
S. Tissot, S. Normand, Y. Khalfallah, B. Delafosse, J. P. Viale, G. Annat, J. Motin, and J. P. Riou E753

Compensatory alterations for insulin signal transduction and glucose transport in insulin-resistant diabetes
J. A. Bonini, J. R. Colca, C. Dailey, M. White, and C. Hofmann E759

Hepatic glycogen accurately reflected by acetaminophen glucuronide in dogs refed after fasting
K. I. Rother and W. F. Schwenk E766

Glucose production in glycogen storage disease I is not associated with increased cycling through hepatic glycogen
K. I. Rother and W. F. Schwenk E774

Ionomycin-stimulated phasic myometrial contractions
M. Phillippe, E. M. Chien, M. Freij, and T. Saunders E779

Prevention of diabetes does not completely prevent insulin secretory defects in the ZDF rat
J. Sturis, W. L. Pugh, J. Tang, and K. S. Polonsky E786

No. 5. NOVEMBER 1995

INVITED REVIEW

Transgenic animals in the study of blood pressure regulation and hypertension
M. W. Thompson, D. C. Merrill, G. Yang, J. E. Robillard, and C. D. Sigmund E793

Expression of IGF-II and IGF binding proteins in differentiating human intestinal Caco-2 cells
Y. Zhang, D. A. Wick, B. Seetharam, and N. M. Dahms E804

Individual lactotropes release prolactin in a temporally divergent and sexually dimorphic pattern
J. P. Castaño and L. S. Frawley E814

Testosterone administration to elderly men increases skeletal muscle strength and protein synthesis
R. J. Urban, Y. H. Bodenburg, C. Gilkison, J. Foxworth, A. R. Coggan, R. R. Wolfe, and A. Ferrando E820

Route of nutrient delivery affects insulin sensitivity and liver glucose transporter expression in rat
V. Colomb, A. Leturque, G. Guihot, M. Loizeau, S. Lavie, S. Colomer, C. Ricour, and J. Girard E827

Contribution of fructose and lactate produced in placenta to calculation of fetal glucose oxidation rate
J. E. McGowan, P. W. Aldoretta, and W. W. Hay, Jr. E834

Effect of hyperthyroidism on circulating levels of free and total IGF-I and IGFBPs in rats
J. Frystyk, H. Grønbæk, C. Skjærbæk, and A. Flyvbjerg E840

Attenuation of glycogenolytic action of activin A in intact rat liver
I. Kojima, R. Nobusawa, Y.-Q. Zhang, N. Sekine, T. Mine, and H. Shibata E846

Interleukin-1β-induced anorexia and pyrexia in rat: relationship to hypothalamic neuropeptide Y
H. D. McCarthy, S. Dryden, and G. Williams E852

Reversion of insulin resistance in the rat during late pregnancy by 72-h glucose infusion
P. Ramos and E. Herrera E858

Regulation of Ca^{2+}-conducting currents in parathyroid cells by extracellular Ca^{2+} and channel blockers
W. Chang, T.-H. Chen, P. Gardner, and D. Shoback E864

Effect of meal timing on diurnal rhythm of human cholesterol synthesis
L. K. Cella, E. Van Cauter, and D. A. Schoeller E878

Urea cycle intermediate kinetics and nitrate excretion at normal and "therapeutic" intakes of arginine in humans
L. Beaumier, L. Castillo, A. M. Ajami, and V. R. Young E884

Human GLUT-2 overexpression does not affect glucose-stimulated insulin secretion in MIN6 cells
H. Ishihara, T. Asano, K. Tsukuda, H. Katagiri, K. Inukai, M. Anai, Y. Yazaki, J.-I. Miyazaki, M. Kikuchi, and Y. Oka E897

PACAP stimulates catecholamine release from adrenal medulla: a novel noncholinergic secretagogue
T. Watanabe, N. Shimamoto, A. Takahashi, and M. Fujino E903

Effects of protein, methionine, or chloride on acid-base balance and on cysteine catabolism
D. L. Bella and M. H. Stipanuk E910

Osteogenic protein-1 enhances phenotypic expression in ROS 17/2.8 cells
A. M. Kitten, J. C. Lee, and M. S. Olson E918

Glucocorticoid deprivation alters in vivo glucose uptake by muscle and adipose tissues of GTG-obese mice
S. C. Blair, I. D. Caterson, and G. J. Cooney E927

Suppression of circulating calcitriol and duodenal active Ca transport by ketoconazole in pregnant rats
A. Boass and S. U. Toverud E934

Phospholipase A_2 activity is increased in guinea pig uterine cervix in late pregnancy and at parturition
M. R. Rajabi and A. V. Cybulsky E940

Use of R-β-[1-^{11}C]hydroxybutyrate in PET studies of regional cerebral uptake of ketone bodies in humans
G. Blomqvist, J. O. Thorell, M. Ingvar, V. Grill, L. Widén, and S. Stone-Elander E948

Constant-pressure perfusion of rat hindlimb shows α- and β-adrenergic stimulation of oxygen consumption
J.-M. Ye, M. G. Clark, and E. Q. Colquhoun E960

Recording of a large-conductance chloride channel in normal rat lactotrophs
M. Fahmi, L. Garcia, A. Taupignon, B. Dufy, and P. Sartor E969

RAPID COMMUNICATION

Insulin-like growth factor I accelerates protein synthesis in skeletal muscle during sepsis
C. V. Jurasinski and T. C. Vary E977

No. 6. DECEMBER 1995

Age-dependent reduction in insulin secretion and insulin mRNA in isolated islets from rats
R. Perfetti, C. M. Rafizadeh, A. S. Liotta, and J. M. Egan E983

Involvement of α_2-adrenoceptors in metabolic and hormonal responses to a mixed meal in beagle dogs
E. Guillot, R. Morand, C. Bouloy, M.-T. Eon, and I. Angel E991

Gut mucosal protein synthesis measured using intravenous and intragastric delivery of stable tracer amino acids
I. M. Nakshabendi, W. Obeidat, R. I. Russell, S. Downie, K. Smith, and M. J. Rennie E996

Insulin increases blood volume in human skeletal muscle: studies using [^{15}O]CO and positron emission tomography
M. Raitakari, M. J. Knuuti, U. Ruotsalainen, H. Laine, P. Mäkelä, M. Teräs, H. Sipilä, T. Niskanen, O. T. Raitakari, H. Iida, R. Härkönen, U. Wegelius, H. Yki-Järvinen, and P. Nuutila E1000

Effects of aging on glucose regulation during wakefulness and sleep
S. A. Frank, D. C. Roland, J. Sturis, M. M. Byrne, S. Refetoff, K. S. Polonsky, and E. Van Cauter E1006

Comparative metabolism of plasminogen glycoforms I and II in the alloxan-diabetic rabbit
M. W. C. Hatton, S. M. R. Southward, B. Ross-Ouellet, M. Richardson, and P. D. Winocour E1017

Local concentrations of macrophage colony-stimulating factor mediate osteoclastic differentiation
S. L. Perkins and S. J. Kling E1024

Effect of physical exercise on glycogen turnover and net substrate utilization according to the nutritional state
P. Schneiter, V. Di Vetta, E. Jéquier, and L. Tappy E1031

Quantitation of hepatic glucose fluxes and pathways of hepatic glycogen synthesis in conscious mice
D. Massillon, W. Chen, M. Hawkins, R. Liu, N. Barzilai, and L. Rossetti E1037

Effect of blood flow on muscle lactate release studied in perfused rat hindlimb
H. Pilegaard, J. Bangsbo, P. Henningsen, C. Juel, and E. A. Richter E1044

Regulation of glucose transport and GLUT-1 expression by iron chelators in muscle cells in culture
R. Potashnik, N. Kozlovsky, S. Ben-Ezra, A. Rudich, and N. Bashan E1052

Effect of training on epinephrine-stimulated lipolysis determined by microdialysis in human adipose tissue
B. Stallknecht, L. Simonsen, J. Bülow, J. Vinten, and H. Galbo E1059

Postprandial free fatty acids stimulate activity of human corticosteroid binding globulin
M. Haourigui, S. Sakr, M. E. Martin, N. Thobie, A. Girard-Globa, C. Benassayag, and E. A. Nunez E1067

Regulation of bioactive and immunoreactive ACTH secretion by CRF and AVP in sheep fetuses
T. J. Zehnder, N. K. Valego, J. Schwartz, A. White, and J. C. Rose E1076

Interleukin-1α stimulates dopamine release by activating type II protein kinase A in PC-12 cells
A. Joseph, A. Kumar, N. A. O'Connell, R. K. Agarwal, and A. R. Gwosdow E1083

Transgenic mice expressing IFN-γ in pancreatic β-cells are resistant to streptozotocin-induced diabetes
D. Gu, M. Arnush, S. P. Sawyer, and N. Sarvetnick E1089

Effect of AVP and oxytocin on insulin release: involvement of V_{1b} receptors
B. Lee, C. Yang, T.-H. Chen, N. Al-Azawi, and W. H. Hsu E1095

Cyclical variation of plasma lipids, apolipoproteins, and lipoprotein(a) during menstrual cycle of normal women
G. Tonolo, M. Ciccarese, P. Brizzi, S. Milia, S. Dessole, L. Puddu, G. Secchi, and M. Maioli E1101

Impact of sampling technique on appraisal of pulsatile insulin secretion by deconvolution and cluster analysis
N. Pørksen, S. Munn, J. Steers, J. D. Veldhuis, and P. C. Butler E1106

MODELING IN PHYSIOLOGY

A model for multiple subcutaneous insulin injections developed from individual diabetic patient data
W. R. Puckett and E. N. Lightfoot E1115

Subject Index to Volume 32 E1125
Author Index to Volume 32 E1133
